Kamal Prasad, Ph.D.
Editor-in-Chief, *South Asian Journal of Experimental Biology*
Infofacility, G-80, Sector 63
Noida, India

Dear Dr. Prasad,

I am pleased to inform you that *South Asian Journal of Experimental Biology* has been accepted for indexing in the AGRICOLA database. AGRICOLA (agricola.nal.usda.gov) contains over 5 million citations to the literature of agriculture and allied subjects, and is used worldwide by researchers, agriculturists and others.

Please be aware that we've recently reengineered our indexing operations, having migrated from manual to automatic indexing. A little over two years ago we installed an automatic indexing system and since then have been "training" it to work more effectively with agricultural terminology. We are now indexing with the automatic indexing system, but have a significant backlog of journal articles to be indexed. It will be a while before *South Asian Journal of Experimental Biology* is indexed and appears in AGRICOLA, but we will index every article for which metadata is provided.

We look forward to indexing *South Asian Journal of Experimental Biology*.

Sincerely,

Michael D. Esman
